Board Turnover

Last month, the CVPCSD bid farewell to Rolando de la Torre, who stepped down from his position on the Board of Directors after 10 years of service. Over the years, Rolando has been instrumental in steering the District through both challenges and opportunities, serving with honesty, integrity, transparency, and dedication. His voice will be sorely missed on the Board, but the positive impact of his leadership will be felt for years to come. Thank you, Rolando.

New Operations Contractor

We would like to welcome our new operations contractor, 49er Water, led by Shane Burr. Shane has extensive experience as a lab director, with over 15 years in the field. He founded 49er Water in 2019, applying his extensive knowledge in the field of water testing to a successful business. With over 40 years of combined experience, we are confident that the team at 49er Water will enable CVPCSD to continue providing our community with the best water possible.

Leash Up and Clean Up

As much as we love our four-legged friends, it's crucial to maintain a community where everyone feels safe and comfortable. This is a gentle reminder to all dog owners to keep your pets on a leash when out and about, preventing unexpected encounters that could lead to accidents, injuries, or distress. A leash is the best way to respect the space of those in our community who are uncomfortable around dogs.

It's also important to respect our beautiful community by cleaning up after your dog. Nobody enjoys stepping in or smelling dog waste, and by cleaning up, you contribute to a cleaner, more pleasant environment for everyone.

Ensure Proper Drainage This Rainy Season

With the rainy season upon us, it's crucial to take proactive steps to prevent flooding and ensure our drainage systems function as intended. A well-maintained drainage system is essential to prevent flooding and water damage within our community. Blocked culverts can lead to water backing up, which can cause flooding in your property and surrounding areas. This not only damages homes but can also disrupt local traffic.

Everyone can help by regularly checking and removing leaves, branches, trash, and sediment from culverts. If we all work together and make this a seasonal routine, we will be doing our best to avoid property floods and avoidable road problems.

By regularly clearing our culverts, we protect our homes, our streets, and our community.

Roadway Tree Maintenance

In the coming months, CVPCSD will be out trimming trees along the roadway. Overgrown branches are a leading obstruction on our roads and pose a hazard when left untended. This maintenance will be ongoing and done as needed. If you have any questions or concerns, feel free to contact the District.

2024 Recap

2024 was an exciting year for the District. Great headway was made in planning for the Kenneth Loop Project, which will ensure critical water service redundancy for a large portion of our residents. We want to thank the community for voicing both your concerns and support and look forward to serving you in 2025.
